CD: Pavement Preservation 2: State of the Practice (FP²/FHWA, 2003)

A valuable collection of current State guidelines for preventive and major maintenance programs. Covers pavement evaluation, project selection, and treatment applications. Also included are State technical manuals on specific preservation techniques, information on establishing preservation programs, and training and public education materials.

CD: Pavement Preservation Toolbox (FP²/FHWA, 2003)

Illustrated reports and technical manuals offer detailed how-to information on a range of preventive maintenance techniques: asphalt emulsion seals, pavement recycling, crack seals, joint seals, spall repair, and more. Technical information was contributed by the Foundation for Pavement Preservation and its member manufacturers.

CD: National Pavement Preservation Forum II: Investing in the Future (FHWA, 2003)

Success stories, details on preventive maintenance challenges, and discussions of what comes next in pavement preservation: the reports on this CD were presented at the National Pavement Preservation Forum II in November 2001. A follow-up to the 1998 Forum for the Future, the event was sponsored by the Federal Highway Administration, CalTrans, and the Foundation for Pavement Preservation and attended by nearly 200 participants.

VIDEO: Preventive Maintenance: Project Selection (FHWA, 2000)

Geared toward pavement engineers, maintenance supervisors, and project managers who make the daily decisions to implement preventive maintenance treatments, this video highlights key factors for achieving optimum results: selecting the right road, selecting the right treatment, and turning the job around quickly. The video contains valuable how-to recommendations on matching the right preventive maintenance technique with the right road for the most cost-effective approach.

VIDEO: Protecting Our Pavements: PREVENTIVE Maintenance (FHWA, 1999)

Five veteran chief engineers relate the transportation system preservation message as they have experienced it: establish dedicated funding, improve strategic planning and programming, and apply the right treatment at the right time. The video is designed to convey the preventive maintenance message to State managers and decision-makers and to local agency staff, county commissioners, and legislators who establish budgets and program priorities.
